- **Statement 1 is correct:** The movement gave impetus to the development of vernaculars. Ramananda and Kabir preached in Hindi, while Namadeva taught in Marathi. The political leaders under the influence of these saints, sponsored translation of many important works right from the Vedas to Ramayana and Mahabharata. Many great commentaries were written especially on Bhakti yoga as preached in Bhagavad Gita.
- **Statement 2 is correct:** Despite the fundamental differences between the two religions a stage came where a common understanding and the similarities were highlighted by the saints, for example Nanak was more influenced by Islam. Both the religions came very close which is evident from the various social practices that got integrated within the religions. They made the religion a personal experience, transcending all barriers and created a feeling of ecstasy wherein everyone could participate and bypass the ritualistic provisions where the priestly class always dominated.
- **Statement 3 is correct:** It resulted due to the long interaction and mutual influence towards each other and it resulted in many great works of Indian philosophy being translated or summarized into foreign languages all over the muslim courts. Muslim preachers and saints were attracted towards Hindu philosophies like Yoga and Vedanta and the sciences of medicine and astrology. The Hindus similarly borrowed the Arabic calendar.
- **Statement 4 is incorrect:** The proselytising zeal of Islam strengthened the conservatism in the orthodox circles of the Hindus. With a view to fortifying their position, they increased the stringency of the caste rules. The most famous scholars of this type were Madhava of Vijanagara and Vishveshwara, the famous commentator on Manu.

- **Ramanujacharya** (11th century)) was a Tamil Vaishnavite Saint who taught in the great temple at Srirangam. He differed with Shankaracharya's 'advaita' and propounded '**Visistadvaita**' or

qualified monism according to which the soul of an individual, though a part of the universal soul, is yet, distinct from it. He called for **bhakti yoga** which means greater stress on devotional worship to a personal God as a means to **salvation**. Another means of salvation was '**prapatti marga**' that is the abandonment of self, putting one's soul completely in the hands of God, trusting his will. Ramanujacharya was **liberal in his social outlook and broke the caste barriers**. His works includes a book called **Vedanta Sangraha** and also wrote commentaries on the Brahma Sutras of Badarayana and the Bhagavad Gita.

- **Madhavacharya** (13th century) was the founder of the 'dvaita' system of philosophy as distinct from the monism of Shankaracharya. According to him, the universe could be divided into two parts, 'Swatantra' the independent being and 'paratantra' the dependent being.
- **Vallabhacharya** (15-16th century) was a Telugu vaishnavite Saint and propounded the philosophy of 'Shuddhadvaita' (pure monism). According to it, God is one, omnipotent and omniscient and the cause of all that there is in the universe. He manifests himself in the form of individual souls and matter (world). Vallabha's teachings are also known as 'Pustimarga' or the path of grace, he was a contemporary of Vijaynagara king Sri Krishnadevaraya.
- **Ramananda** was among the first bhakti saints to preach in Hindi. He was the first to admit women as his disciples. He initiated the Bhakti movement in North India by way of worship of Ram and Sita. He taught in Benares and Allahabad and opposed the claims of the brahmins as the sole custodian of Hinduism. After Ramananda, the Bhakti movement in North-India was divided into Saguna and Nirguna schools. The origin of Nirguna Bhakti is generally traced to Ramananda's teachings.

- He was responsible for the **Dual system of administration in Bengal** under the Nizam and the Company. The Company was given the authority over the Diwani (collection of revenues) and the Nizamat (police and judicial functions) functions without any accountability. He justified the Dual system citing the lesser manpower at the disposal of the company which would make it difficult to carry out the functions of the administration adequately. However, his system of Dual government proved to be a failure in Bengal and led to confusion and anarchy.
- **Double Bhatta** or the military allowance was paid to the military officers who served in Bengal. They regarded it as a part of their salary, and it made the salary of the Bengal officers higher than their counterparts in Madras. Robert Clive caused the payment of Double Bhatta only to the officers serving outside the frontiers of Bengal and Bihar.
- Robert Clive's weaknesses lay in his greed for material gains and Machiavellian methods whereby he indulged in huge corruption and derived illegal gifts. His ambition was only limited to increasing the power of British in India and not on the welfare of the Bengal subjects.

About 'Harit Dhara'

- It is an **anti-methanogenic feed supplement** developed by **Indian Council of Agricultural Research**. When given to bovines and sheep, it **cuts down their methane emissions by 17-20%**. And also results in **higher milk production and body weight gain**.
- Harit Dhara acts by **decreasing the population of protozoa microbes** in the rumen, responsible for hydrogen production and making it available to the archaea for **reduction of CO₂ to methane**.
- It has been **prepared using condensed and hydrolysable tannin-rich plant-based sources** abundantly available in the country.

- Tropical plants containing **tannins** (bitter and astringent chemical compounds) are known to **suppress or remove protozoa from the rumen**.
- **Rumen Fermentation** continues as before, but due to Harit Dhara, there is **more production of propionic acid** now in proportion to **acetic and butyric acid** in this fermentation.

Methane production by Cattle:

- Methane is produced by **animals having rumen**, the **first of their four stomachs**.
- In Rumen, the plant material they eat - **cellulose, fibre, starch and sugars** - gets **fermented or broken down by microorganisms** prior to further digestion and nutrient absorption.
- Carbohydrate fermentation leads to **production of CO₂ and hydrogen**.
- These are used as substrates by **archaea** - microbes in the rumen - to **produce methane**, which the animals then **expel through burping**.

Adjoining areas refer to areas in the states of Haryana, Punjab, Rajasthan, and Uttar Pradesh where any source of pollution may cause adverse impact on air quality in the NCR. The commission will be a statutory authority that will replace the 22-year-old Supreme Court-mandated Environment Pollution Control Authority (EPCA) which has introduced several important interventions to control pollution.
- **Statement 2 is incorrect:** The Commission will be the **sole authority with jurisdiction over matters defined in the Ordinance** (such as air quality management). **In case of any conflict, the orders or directions of the Commission will prevail** over the orders of the state governments (of Delhi, Haryana, Punjab, Rajasthan, and Uttar Pradesh), the Central Pollution Control Board (CPCB), state PCBs, and state-level statutory bodies.

- **Statement 1 is correct**: Established in 1958 as an Act of Parliament, **AFSPA** grants special powers to the Indian Armed Forces in disturbed areas. A **disturbed area is one which is declared by notification under Section 3 of the AFSPA**. It can be invoked in places where the use of armed forces in aid of civil power is necessary. The **Central Government, or the Governor of the State or administrator of the Union Territory** can declare the whole or part of the State or Union Territory as a disturbed area. Currently, AFSPA is implemented in Jammu & Kashmir, Assam, Nagaland, and parts of Arunachal Pradesh and Manipur.

- **Statement 2 is correct**: The issue of repealing/amending AFSPA is being looked at by the government and **Justice Jeevan Reddy Committee** and the Administrative Reforms Commission (ARC) have also made certain recommendations on the subject.
